

History of Architecture

이병주

승자의 기록은 태양의 조명을 받아 역사로 남지만,
패자의 기록은 달빛의 조명을 받아 신화나 전설이 된다.

Why should you know the history

건축이론의 많은 부분은
건축사 연구의 결과이다.

역사학자

- Edward Hallet Car
 - “What is History?” : 역사란 역사가와 사실들의 지속적 상호작용의 과정이자, 현재와 과거의 끊임없는 대화이다.
- 단채 신채호
 - 역사를 잊은 민족에게는 미래는 없다

근대건축교육

- 바우하우스(1919)
 - 의도적으로 건축사 배제 : 새로운 건축을 추구하기 위해서는 과거와의 연결을 끊고 ‘원점에서 출발’
 - 근대건축은 과거를 단절, 건축의 역사성과 ‘인간성’을 잃음
 - 어느 시대의 건축도 앞 선 시대의 건축에서 단절되어 생겨나지 않았다

Good Design

좋은 디자인은

- 세상을 감정과 이성으로 이해하는
- 우리의 능력과 우리 자신 안에 있다.
- 좋은 건축 디자인은 감각적이며 지적이다.
- 우리의 방, 우리의 집, 우리의 마을, 우리의 경관.
- 우리는 일찍부터 무의식적으로 이 모두를 경험한다.
- 우리가 알고 있는 건축의 뿌리는 어린 시절이다.
- 그 뿌리는 우리의 역사 속에 있다.

- 페터 Zumthor의《페터 Zumthor 건축을 생각하다》중에서 -

2009 프리츠커상, 스위

Allsopp Bruce

A General History of Architecture, Pitman(1960)

- 건축사가 있으니까
- 건축가의 지혜를 기르기 위하여
- 인류와 건축을 더 잘 이해하기 위하여
- 건전한 판단과 비판을 위하여
- 더 나은 건축을 설계하기 위하여

Deconstruction

Who is the Architect?

The word ***architect*** is derived from the Greek word ***architekton*** meaning master builder. One who designs buildings and supervises their construction.

Architects are licensed professionals trained in the art and science of building design. They transform **needs into concepts** and then develop the **concepts into images and plans of buildings** that can be constructed by **others**.

The Architecture Profession

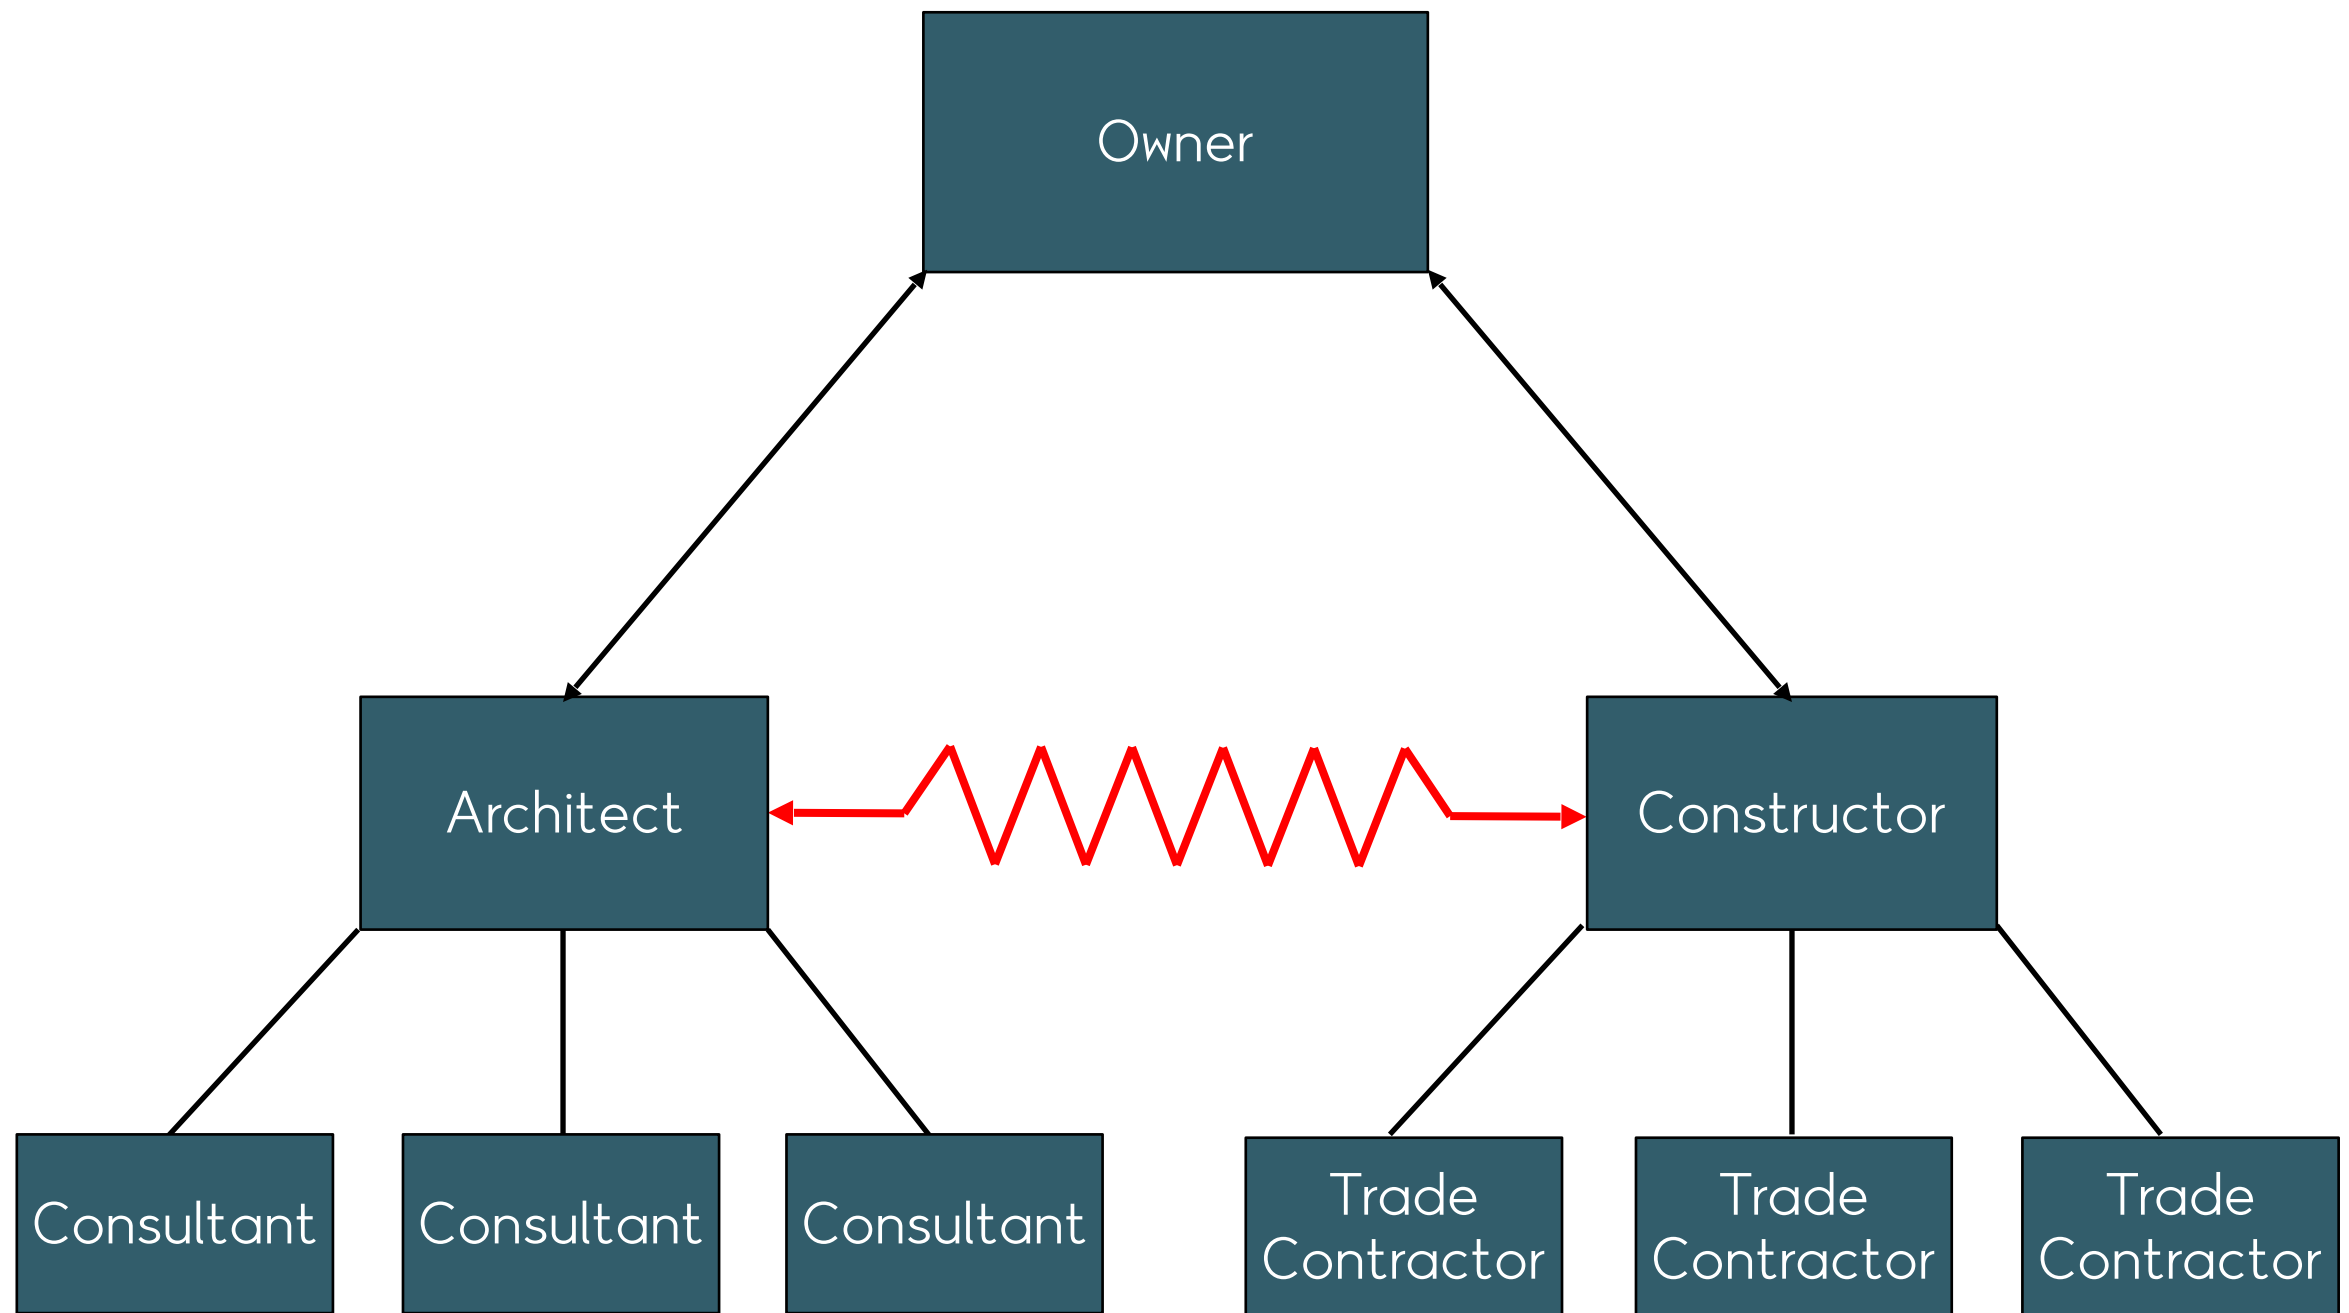

Architecture, as a profession is **the practice of providing a service, which includes many different disciplines while the overall aim of an architect is to design buildings.**

Architecture can refer to the actual product, **the architecture of a building** or it can refer to the **method** or **style** used to design the building.

The Education of the Architect

The Education of the Architecture

École Nationale Sup. des Beaux-Arts, Paris.

The origins of the school go back to **1648** when the "Académie des Beaux-Arts" was founded by Cardinal Mazarin to educate the most talented students in drawing, painting, sculpture, engraving, **architecture** and other media.

The Beaux-Arts training emphasized the mainstream examples of Imperial Roman architecture, Italian Renaissance and French and Italian Baroque models.

The Education of the Architecture

École Nationale Sup. des Beaux-Arts, Paris.

Beaux-Arts training emphasized the production of **quick conceptual sketches**, **highly-finished perspective presentation drawings**, close attention to the **program**, and **knowledgeable detailing**.

Site considerations tended towards social and urbane contexts.

The Education of the Architecture

The UK schools

The first school in the **United Kingdom** to offer a structured program of instruction was the **Architectural Association (AA)**, founded in **1847**.

School has continued to draw its teaching staff from **progressive international practices**, and they are reappointed **annually**, allowing a continual renewal of the exploration of architecture

Courses are divided into two main areas – **undergraduate programmes**, leading to the **AA Diploma**, and **postgraduate programmes**, which include specialised courses in landscape urbanism, housing and urbanism, energy and the environment, histories and theories, design research lab, building conservation, garden conservation, and environmental access.

The Education of the Architecture Bauhaus, Germany.

A school in **Germany** that combined crafts and the fine arts.

It operated from **1919 to 1933**, and for the approach to design that it publicized and taught.

The Bauhaus school was founded by **Walter Gropius**.

The name Bauhaus stems from the German words for "**to build**" and "**house**."

The Education of the Architecture Bauhaus, Germany.

Bauhaus style became one of the most influential currents in **Modernist architecture** and **modern design**.

The teachings at the Bauhaus school of design were greatly influenced by **the machine age**.

The school's aim was **to fuse all the arts under the concept of design**.

The Education of the Architecture MIT, USA.

The first architecture schools in the USA were in universities of MIT, Cornell, and Illinois.

Architecture was first taught at the Massachusetts Institute of Technology in **1868**.

In **1932** the School of Architecture was established.

The Education of the Architecture Cornell, USA.

In **1882** Andrew Dickson White, the first president of Cornell University established a new program to provide formal academic training in architecture.

By **1896** the College of Architecture also offered classes in drawing, painting, and sculpture, and a department of art was formally added in 1921.

Drafting Room

Sample Curriculum for an Architecture Program:

- Design Communications
- Architectural Design
- History of Architecture
- Theory of Architecture
- Working Drawings
- Structural Design
- Lighting and Illumination
- Introduction to Urban Design
- Interior Architectural Design
- Computer-Aided Design
- Professional Practice
- ...

The Education of the Architecture

Project Based Learning

- In architecture education we apply what is known as “Project Based Learning” (PBL).
- Project Based Learning allows teachers to create tasks whose complexity and openness mimic problems in the real world.
- Students can see the interdisciplinary nature of these tasks, and see that **each task may have more than one solution.**
- Students have the freedom to **choose different strategies and approaches** may become **more engaged in the learning process**, and these students will be more likely to approach other problems with **an open mind.**

Comparison Between Architectural Design in Practice and in Education

	In Practice	In Education
Client/Owner	Real	Hypothetical
Economics	High priority	Low priority
Constructability	High priority	Low priority
Focus	Product	Process
Building Industry	High priority	Low priority
Licensing	Required	Not required
Codes and Regulations	Applied	Considered
Compensation	(\$) Money	Grade (A)

Conclusions

There commonalities and differences between architectural design **in practice** and **in education**.

Commonalities include: design process, graphics, presentation, creativity, etc ...

Differences include: client, budget, constructability, contractor, specialists, etc ...

While the focus in **PRACTICE** is on the **PRODUCT**, the focus in **EDUCATION** is on the **PROCESS**.

In **PROJECT BASED LEARNING** (BPL), the project is only a vehicle for learning by doing.
