

Chair

4100

Propose

Propose

- Experience the structure_compression, tension

Time

- 3 hours

Goal

- Load 100kg
- More than 45cm

Materials

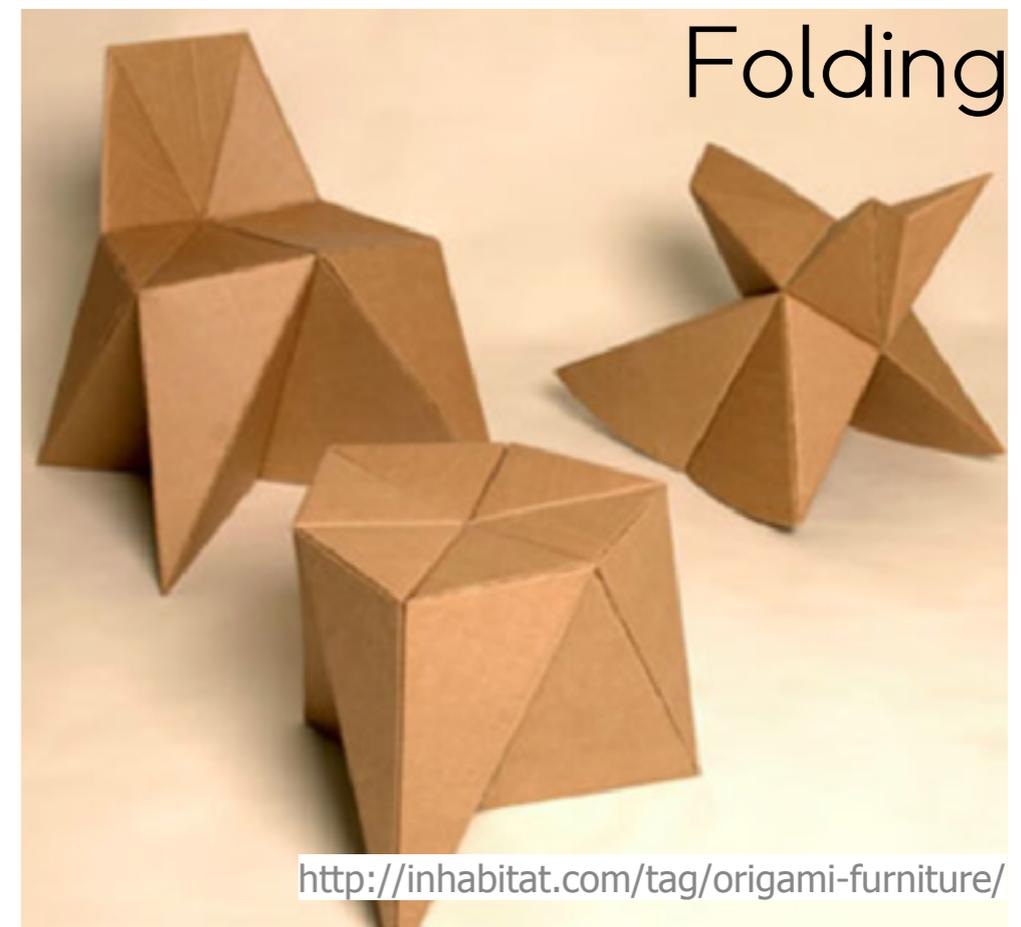

- Cardboards
- Cutter, scissors, paper

Joining techniques

Different joining techniques

Out of these ways found, slot joints are simple and are quite easy to construct. Although with the correct folding the envelope method and folding could be very strong, with the limited cardboard we have they wouldn't be the most practical option.

Another good feature of the slot method is that as its so simple, it would be hard to get wrong during cutting out. 3
